

Scavenger Hunt: Let's Go Exploring

Develop your science skills by completing these questions and challenges!

OBSERVE– using the five senses to identify and collect information about an object or event.

I observed:

COMMUNICATE– sharing data or experiences verbally, in writing, or by drawing.

I shared this new fact:

CLASSIFY– group objects together based on similar characteristics or differences.

The items I found are similar because:

The items I found are different because:

PREDICT– make an educated guess of possible outcomes based on what you know and observe.

I predict that:
Will result in:

MEASURE– using mathematical units and tools to collect and compare data.

I measured:

INFER– using observations and prior knowledge to make predictions and draw conclusions.

Because of:
This could mean:
